

4D CUBE - TESSERACT

Create the net of a 4D
Cube by using 8 cubes.
Then print and stick the
info labels on each faces
of the net.

4D CUBE - TESSERACT

OR simply ask each student
(a class of 24 students would be great)
to come up with a fact about the
Tesseract then collect them all to
create the faces...

FACE #1

WELCOME TO

4TH

DIMENSION

THIS SHAPE IS
CALLED

4

DIMENSIONAL
CUBE

FACE #2

FACE #3

IT IS ALSO
CALLED A
TESSERACT

FACE #4

The name
“Tesseract” comes
from the
Greek, meaning
“four rays”, referring
to the four mutually
perpendicular
directions on which it
is based.

FACE #5

IT IS CALLED

A

4-

HYPERCUBE

FACE #6

FACE #7

DO YOU
REMEMBER WHERE
DID YOU HEAR

ABOUT THE WORD
<<TESSEARACT>>
BEFORE?

FACE #8

DO YOU NEED
 CLUE?

FACE #9

THIS IS ACTUALLY
THE NET
(OPEN FORM)
OF
A
4D
CUBE

FACE #10

THE NET OF THE
TESSERACT
CONSISTS OF

8

CUBICAL CELLS

A TESSERACT
HAS

24

FACES

FACE #11

A TESSERACT
HAS

32

EDGES

FACE #12

A TESSERACT
HAS

16

VERTICES

FACE #13

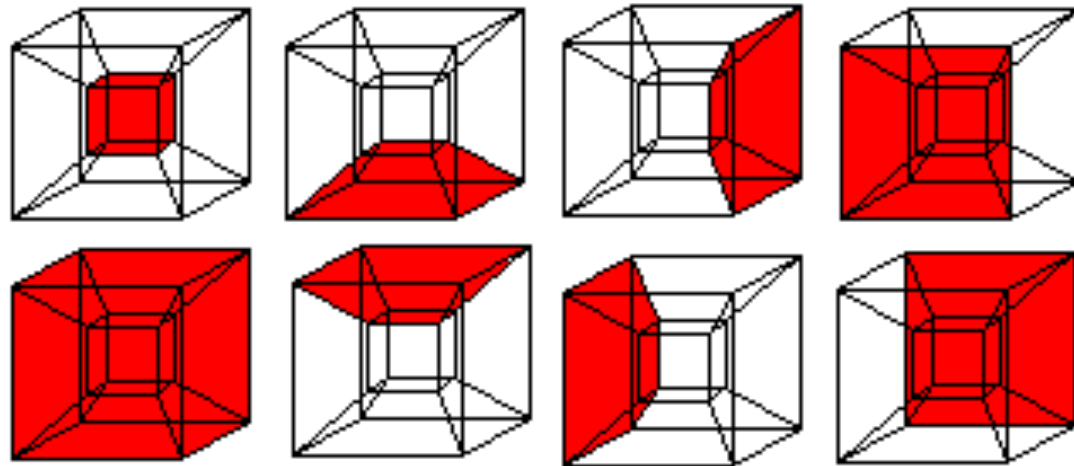

FACE #14

4 cubes, 6 squares, and 4 edges meet at each corner.

3 cubes and 3 squares meet at each edge.

2 cubes meet at each square.

FACE #15

CAN YOU GUESS
THE NAME OF
THE FAMOUS
PAINTER WHO
ENTERED THE
4TH DIMENSION?

FACE #16

A 1954 painting
by
SALVADOR
DALI
features a
mysterious, 4D
'HYPERCUBE'.

FACE #17

The CRUCIFIXION

unites
a classical
portrayal of
Christ
with a shape
that
only exists in
mathematical
theory.

FACE #18

FACE #19

It's not possible to see a 4D cube in our limited 3D universe, but there are different ways to imagine one.

- Marcus du Sautoy

FACE #20

A 3D Cube and its net

A 4D Cube and its net

FACE #21

THERE ARE
261
DISTINCT NETS
OF THE 4D
CUBE
(FOR NOW)

Let's listen the concept
of 4D from the Epic
Cosmos "Carl Sagan"

<https://goo.gl/AbG96F>
